Full-Stack developer with +5 years of experience working in the area of analysis and application development, based on Web technologies (PHP, HTML, CSS), using the Laravel Framework as my work base. I have brought improvements by 20% and data processing advances by 18% with the developed applications. I am a self-taught person, eager to learn new tools such as react, angular, and python, among others; with the ability to grow professionally in the work area, creative, proactive, and with a very good disposition. My goal is to be part of an excellent team and contribute to technological solutions for the organization.

EXPERIENCIE

Hotel Plaza Meru, Systems Developer — April 2019 - currently

- I have designed and developed an Employee Management and Control System, which the organization has been able to reduce the response time from 20min > to 3min and improve information processing by 18%.
- New enhancements and additional modules are still being worked on.
- I provide support to the DBA, monitoring the structure of the data entered from the system.

Tech Stacks: PHP, HTML, CSS

Banco Caroni Banco Universal, Systems Operator II — January 2011 - April 2019

- I was part of the team in charge of the banking operations support, monitoring the activity status of the Core Banking systems.
- I reduced the response time for users by 8% by using the default applications.

Tech Stacks: Own software.

VEPICA, Freelance — March 2018 - June 2018

- I participated in the design and development of a Web Application.
- I reduced the statistical time from 12m > 3m using HTML and SQL Server.

Tech Stacks: PHP, HTML, SQL Server, Web Application
